

TRAINING AND E-LEARNING: EDUCATE AND INSPIRE YOUR STAFF

Carbon Clear offers training to help build an understanding of the challenges and opportunities of climate change within your organisation. We will help you to establish a common direction by focusing our sessions on capacity building, allocating responsibility, and creating momentum.

Our training and e-learning services can help your organisation to:

- Educate your staff about the science of climate change and how it relates to them
- Encourage behaviour change to reduce emissions and save money
- Inform your stakeholders about your CSR and environmental strategies
- Inspire by showcasing your environmental commitment and achievements in reducing your organisational carbon impact.

CARBON CLEAR'S TRAINING AND E-LEARNING SERVICES

1. Training Sessions

We are able to design training modules which range from general environmental education (such as building green teams and the business case for carbon management) through to the more technical and expert (such as climate change and carbon footprinting).

Depending on your need, content can be delivered in the form of a formal training course or in a more informal context such as drop in sessions, lunch meetings and information posters.

2. E-learning Tool

'Carbon Reduction at Work' is an online tool for raising awareness and helping your staff to reduce their individual carbon impact. This visually rich and interactive course informs, educates and uses a carbon calculator to reveal the carbon footprint of each staff member within your organisation.

This can result in big reductions to an organisation's carbon footprint - improving staff morale, your company's reputation and saving you money. In addition, we can provide you with a range of management information statistics, including the number of staff who have completed the course, individual carbon footprints and an aggregated footprint for the workforce.

For more information about carbon education and training, or how we could tailor a solution to meet your needs, please call **0845 838 7564** or e-mail **ENQUIRIES@CARBON-CLEAR.COM**.
